As an election official I want to be able to input multiple files at once So that I can see the results of many files at once.		
As election official I want to be able to process an IR file so that I can easily check the winner of an IR election		
As an election official I want to be able to process a CPL file so that I can easily check the winner of a CPL election		
As election official I want have a user friendly interface so that I can easily understand and input the files I want		
As an election official I want to be able to input a CSV so that I can easily check the winner of an election		
As an election official I want to be able to search for files so that it is easy to find the files I need		
As an election official I want to use the arrow keys to look for files so that I can quickly find the file I need		
As an election official I want ballots to be checked based on the rules of the election so that the election is fair and has integrity		
As an election official I want the list of candidates to be correct from the file so that the election is fair and accurate		
As election official I want the remaining seats after the first round to be assigned randomly so that we can continue the voting process		
As election official I want ties to be handled fairly. so that we can determine winners from the tied scenario		
As election official I want to produce an audit file so that we can record the processed data		
As election official I want to view a table at the end of the IRV process so that I can visibly see what has been done		
As an election official,I want a Popularity Only (PO) algorithm, so that a single winner can be determined based on the candidate receiving the most ballots		
As an election official, I want the Popularity Voting algorithm to handle ties fairly. so that the election results are accurate and unbiased even in the event of a tie.		
As an election official, I want the Popularity Only voting algorithm to generate an audit file, so that the election results can be audited and verified for accuracy and integrity.		
As an election official, I want to be able to view statistics at the end of a Popularity Only (PO) election, so that I can analyze the results and gain insights into the election.
